

BIO OPTI-MAG

FALCON UAV
SOIL NUTRITION

WHAT IS BIO OPTI-MAG?

Opti-Mag is a premium source of liquid Magnesium for soil and plant nutrition which contains forms of Magnesium that deliver the applied nutrient to the plant in a form that is more compatible to the plant's biological processes.

Opti-Mag contains added carbon chelators and advanced fulvic acid extracts, which individually are very useful plant stimulants or microorganism food sources or both. Here again, as with most of our liquid products, combining significant amounts of these compounds together creates a SYNERGY - where all the components together give a greater result than all of them would give if applied individually.

The use of Opti-Mag assists plants with formation of the chlorophyll molecule, regulation of Nitrogen within the plant and sucrose transport, energy metabolism as well as numerous biological processes.

Opti-Mag is exceptionally effective applied via fertigation

Total Major Nutrients:	Unit
Magnesium (Mg)	% 4.89
Sulphur (S)	% 0.05
Fulvic Acid	% 4.00
Carbon Chelators	% 11.30
Total Minerals:	
Silicon (Si)	mg 86
Manganese (Mn)	mg 23

Application Rates

Foliar:

1-5 litres per hectare or as advised

Watered In:

10-30 litres per hectare or as advised

Dilution rate:

1:20 or as advised

Store in a cool place away from sunlight

Stir well before use

Our Wild Harvested Seaweed and Abalone Fertilisers are sustainably sourced from Victoria waters. Our Full range of Organic Fertilisers are proudly Australian Made & Owned.
